EMAN FATIMA

Software Engineering | AI Agents
Lahore, Punjab, Pakistan • emancyber56@gmail.com • LinkedIn Profile

PROFESSIONAL SUMMARY

Results-driven Software Engineering student (CGPA: 3.65) with demonstrated expertise in C++, full-stack web development (MERN stack), and modern AI Agent architectures. Proven track record in low-level OOP design, database integration, and high-performance algorithms. Recognized fellow in selective international leadership programs with a passion for scalable systems and technical problem-solving.

TECHNICAL SKILLS

Languages:	C++, Python, JavaScript (ES6+), SQL, HTML5, CSS3
Frameworks & Tools:	React.js, Node.js, Express.js, SFML, LangGraph, REST APIs, Git, GitHub
Databases:	MongoDB, PostgreSQL, MySQL
Core Competencies:	Object-Oriented Programming (OOP), Data Structures & Algorithms, AI Agent Architecture, Model Context Protocol (MCP)

WORK EXPERIENCE

Afrium — Artificial Intelligence Engineer (Cohort Member)
Aug 2026 – Oct 2026
Remote

- Selected for the competitive Afrium Summer of Code program under specialized industry mentorship.
- Learned custom AI Agent architectures and implemented Model Context Protocol (MCP) servers to enable seamless data exchange between LLM applications and external tools.
- Benchmarked agentic workflows for system reliability, execution speed, and contextual accuracy.

QuantumLogics — Front-End Developer Intern
Jul 2026 – Sep 2026
Remote

- Built responsive front-end features for Digital Logics Studio, a digital logic learning platform, using React.
- Implemented the interactive trainer board logic for connecting components through pins.
- Collaborated with senior engineers on code reviews, cross-browser debugging, and agile sprints.

TECHNICAL PROJECTS

WhatsApp Urgent Message Router | Python, Gemini API, AI Agents — Aug 2026

- Built an autonomous message-routing pipeline during HackerRank Orchestrate Challenge (Ranked #475 / 1,983 global participants).
- Built a Gemini-powered routing pipeline (parse, guardrails, context building, LLM decision) that classifies each WhatsApp message as notify, digest, or mute.

Multi-Format Auction Management System | C++, SFML, SQL

- Architected desktop software using key OOP principles (Encapsulation, Inheritance, Polymorphism, Abstraction).
- Programmed state engines for Dutch Auctions (descending price engine) and English Auctions (ascending bid validation).
- Integrated relational SQL database schema for user authentication, transaction logging, and real-time inventory updates.

Custom 2D Pac-Man Game Engine | C++, SFML

- Engineered a 2D arcade game engine from scratch utilizing modern C++ and the SFML graphics rendering library.
- Implemented game loop architecture, collision detection, tile-map rendering, and grid pathfinding for enemy AI.

EDUCATION

FAST NUCES (National University of Computer and Emerging Sciences) — Expected Jun 2029
Bachelor of Science in Software Engineering — CGPA: 3.65/4.00 — *Lahore, Pakistan*

- **Academic Honors:** Dean's List Scholar (1st and 2nd Semesters), 4th position in my department (1st Semester)
- **Campus Activities:** Scriptwriter, Drama Society | Officer & Security Team Member, Global Leadership Initiative (GLI)

FELLOWSHIPS, COMPETITIONS & CERTIFICATIONS

- **HackerRank Orchestrate AI:** Ranked #475 / 1,983
- **Aspire Leaders Program:** Selected Fellow (Cohort 4)
- **nexFellow Builders Program:** Builder Fellow
- **SOFTEC '26 & RC3:** Speed Programming Participant
- **Meta:** Intro to Front-End Development (Jul 2026)
- **Google:** Maximize Productivity with AI Tools (Jun 2026)
